Response to Amendment

1. The prior art rejections of record are maintained in response to Applicants' amendment.

Response to Arguments

2. Applicants' arguments have been fully considered, but are not persuasive because Applicants allege that the prior art of record does not teach error correction capability based on the number of bits per cell (Claims 1, 15, 29, 38).

Examiner disagrees and notes that:

- a. such language 'error correction capability based on the number of bits per cell' is not recited as a claim limitation. 'Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).'
- b. the prior art of record does not limit error correction capability exclusively to worst cell error probability.

Examiner further notes that Applicants concede that the prior art of record does teach error correction capability based on worst cell error probability wherein the operating mode is effected with the highest number of bits per cells. Error correction capability is thus performed based on selection of bit cell density (highest number of bits per cells) as claimed.

Examiner thus maintains that the Claims at bar, in their current form, are not distinguished over the prior art of record, namely **Gregori**.

Conclusion

THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks, Washington, D.C. 20231
